

Red Stealer Threat Intelligence Report

Questions, Answers & Evidence

Q1

Categorizing malware enables a quicker and clearer understanding of its unique behaviors and attack vectors. What category has Microsoft identified for that malware in VirusTotal?

Answer: Trojan

Q2

What is the file name associated with this malware? (Do not include the file extension.)

Answer: Wextract

Names ⓘ	
Wextract	
WEXTRACT.EXE .MUI	
248fcc901aff4e4b4c48c91e4d78a939bf681c9a1bc24addc3551b32768f907b.exe	
malicious.exe.bin	
Acrobat.exe	
WEXTRACT.EXE.MUI.infected	
WEXTRACT.EXE.MUI.infected (2)	
malicious.exe	
248fcc901aff4e4b4c48c91e4d78a939bf681c9a1bc24addc3551b32768f907b.exe.bin	
malicious.exe (2)	

Q3

What is the UTC timestamp of the malware's first submission to VirusTotal?

Answer: 2023-10-06 04:41 UTC

History ⓘ	
Creation Time	2022-05-24 22:49:06 UTC
First Seen In The Wild	2023-10-07 07:20:23 UTC
First Submission	2023-10-06 04:41:50 UTC
Last Submission	2026-06-07 02:50:26 UTC
Last Analysis	2026-08-04 11:26:46 UTC

Q4

What is the MITRE ATT&CK technique ID for the malware's data collection from the system before exfiltration?

Answer: T1005

Q5

Following execution, which social media-related domain names did the malware resolve via DNS queries?

Answer: facebook.com

Q6

Provide the IP address and destination port the malware communicates with.

Answer: 77.91.124.55:19071

Q7

Using MalwareBazaar, what is the YARA rule created by Varp0s that detects the malware?

Answer: detect_Redline_Stealer

YARA Signatures

MalwareBazaar uses YARA rules from several public and non-public repositories, such as [YARAhub](#) and [Malpedia](#). Those are being matched against malware samples uploaded to MalwareBazaar as well as against any suspicious process dumps they may create. Please note that only results from **TLP:CLEAR** rules are being displayed.

Rule name:	detect_Redline_Stealer 
Author:	Varp0s
Rule name:	INDICATOR_EXE_Packed_ConfuserEx 
Author:	ditekSHen
Description:	Detects executables packed with ConfuserEx Mod
Rule name:	NET 
Author:	malware-lu

Q8

What malware alias is associated with the malicious IP according to ThreatFox?

Answer: RedLine Stealer

win.redline_stealer [\(Back to overview\)](#)

RedLine Stealer

aka: [RECORDSTEALER](#)

Propose Change

RedLine Stealer is a malware available on underground forums for sale apparently as a standalone (\$100/\$150 depending on the version) or also on a subscription basis (\$100/month). This malware harvests information from browsers such as saved credentials, autocomplete data, and credit card information. A system inventory is also taken when running on a target machine, to include details such as the username, location data, hardware configuration, and information regarding installed security software. More recent versions of RedLine added the ability to steal cryptocurrency. FTP and IM clients are also apparently targeted by this family, and this malware has the ability to upload and download files, execute commands, and periodically send back information about the infected computer.

Q9

Which DLL is utilized by the malware for privilege escalation?

Answer: advapi32.dll

Modules loaded ⓘ
